

HOU-WM6006 Metal detector

Features:

- 18 detecting zones
- Aluminum Alloy frame
- Human Shape LED Display and LED lamp indicates the alarming position
- Counting the total people crossed and alarming times
- Economic style
- Alarm time adjustable: 25-0s, Alarm volume adjustable: 255-0, Alarm tone: 10-1.

Specifications:

Outer frame : 2200mm(H)X800mm(W)X500mm(D)
 Channel size: 2010mm (H) X700mm (W) X500mm (D)
 Weight : About 70kg
 Work environment : -20- +45 ℃
 Complied standards GB15210-94
 Power supply: 220V,AC
 Power: <30W
 Material of panel: Import synthetic material,moisture and fire proof
 Count detecting Infrared sensor,mechanical anti-interference
 Sensitivity: Adjustable from 0 to 255

Product Specifications:

- Model : HOU-WM6006

Description:

Product Process: Using imported synthetic material, once suppressed by the special arts and crafts made of moisture, fire. Infrared technology: through an infrared sensor, mechanical interference ability. Adjustable area

sensibility: Between the self-regulation can be 0-255 sensitivity, according to the user demands the removal of the actual sensitivity and carried by the body jewelry, belt buckle, metal zipper and so on. The maximum sensitivity can detect metal objects the size of the clip.

Alarm Model: Alarm time adjustable: 0-25s, Alarm volume adjustable: 0-255, alarm tone: 1-10. Statistical

functions: Intelligent and Statistics by the number of personnel and alarm times.

Easy to operate: Operation panel for the thin-film panel, high-brightness display panel can directly display alarm area, precise location of the instructions have been exploratory items, and have sound and light alarm simultaneously.

Password protection: Set authorization, password manager, allowing only authorized personnel to operate which can effectively prevent others to modify the parameters.

Harmless to human body: On the human body, the heart pacemakers, pregnant women, magnetic floppy disks, tapes, video tapes and other sound.

Easy installation: XLD Series metal detector gate is a combination of design, easy installation and removal, operating instructions easier to understand.

Applications: Hotel, railway/bus/subway station, stadium, exhibition hall, etc
