

ACIC PRIVACY

THE NEW EUROPEAN STANDARDS AND THE «GENERAL DATA PROTECTION REGULATION» (GDPR), FORCE THE WORLD OF VIDEO SURVEILLANCE TO ADAPT. THE PRIVACY SOLUTIONS HAVE THEREFORE BECOME A STANDARD PRODUCT AVAILABLE IN MOST VIDEO SURVEILLANCE INSTALLATIONS.

AcicPrivacy is a video analytics application that allows you to place a blurry area or occlusion on different types of objects. **AcicPrivacy** enables precise detection of certain types of objects using artificial intelligence technology and real-time tracking of the target in the image. This solution works on an analytics server and is dedicated to the monitoring of public areas such as a shopping centers, streets, stations, airports, ...

FEATURES

- Automatic target detection using AI
- Tracking of the target in the image
- Objects classification
- Real-time action
- Multiple targets per camera
- Indoor and outdoor operation
- Server-based (GPU mandatory)

COMPETITIVE ADVANTAGES

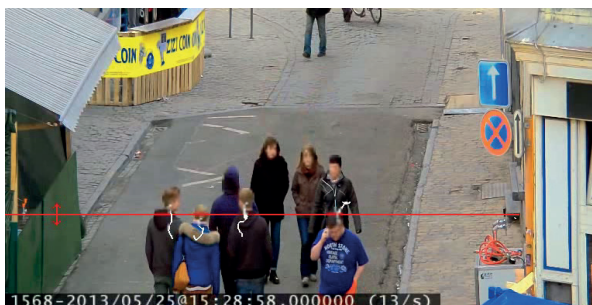

- Cost effective solution
- Can work on existing CCTV cameras, PTZ cameras, IP cameras
- Very robust to changing outdoor conditions
- Simple and intuitive configuration
- Direct and flexible support

APPLICATIONS

- Face blurring
- Occlusion of people
- License plate blurring
- Shopping Mall
- Airports / Train stations

RECOMMENDATIONS

The AcicPrivacy application is only supported on visible cameras and a GPU will be required for its proper functioning.

INTEGRATION SOLUTION

ACIC solutions are fully integrated with the main VMS solutions. Such as Avigilon, Seetec, Exacq United Technologies, Genetec, Prysm, Milestone, ...
